

COOPERATIVE ECONOMIC INSECT SURVEY REPORT

Glenn A. Salsbury, Survey Entomologist

Report 2, Volume 57

March 7, 2009

LONE STAR TICK: Adults are now active.

CLUSTER FLIES: Flies were a nuisance when gathering on the outside of a house near the door.

MOSQUITOS: First noted active on 7 February. No larvae have as yet been found.

TERMITES: First noted active on 7 February.

ALFALFA WEEVIL: Growers need to begin watching for this pest. Alfalfa is beginning to green up in Southeast Kansas.
